

(a) infinite universe: $\mathbb{E}[\text{Regret}] = T - 2 + o(1)$

(b) two types already cost $\sqrt{T}$, at $|\mathcal{U}| = 2$

(c) scheduled revelation: $\text{regret} \geq |K|(B - 2)$ (Thm. 22)

(d) same $N = |K|$ reports: chosen times vs. fixed times
